

NAMO *Ultima*

**Made in India.
Made for you.**

www.namoorrganisations.com

Established in the year 2015, NAMO Projects was started with limited resources. Further, the organization started setting benchmarks in the uPVC industry with 70,000 Sq Ft workspace comprising two fabrication units and two warehouses in Telangana and Andhra Pradesh. The organization has a team of 180 employees and an installation experience of over 4 Lakhs windows across India. With no compromise in the quality and our state-of-the-art services, had made us the preferred choice for clients who are looking for Quality and Premium uPVC Windows. With this experience, NAMO Projects forayed into uPVC profile Extrusions with a State-of-the-art infrastructure in Hyderabad, India. NAMO Projects developed a premium uPVC profile formulation with 8 PHR Titanium Dioxide and a 100% Calcium Zinc stabilizer to provide absolutely Lead-Free profiles.

It is a known fact that nature's resources have always been consumed by mankind from the beginning to a greater extent. The forests were destroyed by the humans for their shelter by cutting down the trees to obtain wood and timber. It's a threat to mankind to destroy the world around. We promise to prevent cutting trees, our Government is conducting numerous plantation programs to fight against Global Warming from our end, we are giving our best efforts for Green Environment by bringing uPVC Windows and Doors against Wooden Windows and Doors which directly promotes Eco Balance to the nature.

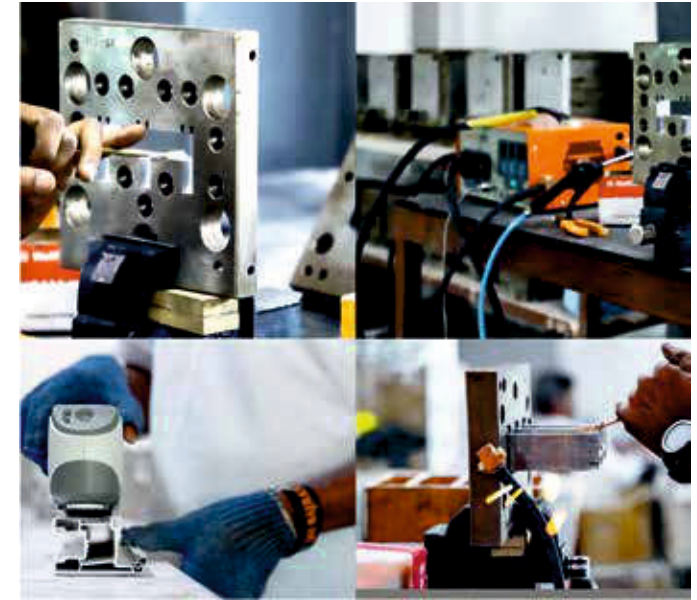

SOPHISTICATED MACHINERY

Our highly sophisticated extruders deliver a uniform mix of ingredients of raw material in a robust manner. Moulds and Dies used in profile extrusion are of high precision that ensures 100% accuracy in profile dimensions and premium surface finish.

RAW MATERIAL

NAMO Profiles are made of superior quality raw materials, sourced from renowned suppliers across the globe. Every raw material is being tested for its quality before reaching our production unit. We always associate with the best material suppliers to ensure a defined product outcome.

QUALITY CONTROL

Our Profile quality test is executed for every batch as per Industry Standards, and the Color variation is tested using a spectrophotometer

- Impact strength
- Density
- Welding strength
- Heat reversion
- Falling mass test for cold impact
- Vicat softening temperature
- Surface finish test with a gloss meter

SPECIFICATIONS

European Standards 12608-1:2016

- Lead-free (RoHS Compliant)
- 8 phr Titanium Dioxide
- TPE Gasket
- High UV Resistance

To serve different client requirements we have designed

ULTIMA WINDOW SYSTEMS
ULTIMA VILLA WINDOW SYSTEM

REINFORCEMENT

Reinforcement is the heart of uPVC Windows and Doors. NAMO Ultima windows are heavily reinforced for long-lasting. We recommend 1.2mm to 2.5mm thickness of GI reinforcement to withstand heavy winds. The company procures galvanized reinforcement from renowned steel companies.

HARDWARE

Hardware plays a key role in window performance, hence for our ULTIMA Windows and Doors we use one of the industry's best uPVC hardware such as KINLONG /ASSAABLOY DOORSET.

Mahogany, Walnut and Golden Oak

WILL BE SHORTLY AVAILABLE WITH US.

NAMO uPVC Windows & Door Systems comes in the finish of your choice to match the decor of each room of your house. You can select the options from the natural wood finish: Walnut and Mahogany or the popular Pristine White. Windows of genuine wood are appealing in wooden color with the aesthetic appearance matching the interior designs.

Walnut

Golden Oak

NAMO *Ultima*

NAMO Ultima windows are of premium quality compared to other products, providing the best windows to our clients. While purchasing windows, we ensure our clients are aware of all the specifications, so that they can understand easily why our product is premium. We are a profile manufacturer as well as a window fabricator, which means we aren't dependent on the suppliers. The company has installed more than 3,50,000 windows and doors so far.

**WE ARE ALWAYS READY TO GIVE BEST QUALITY,
SERVICE & PRICE TO OUR VALUABLE CLIENTS**

It's unwise to pay too much, but it's worse to pay too little. When you pay too much, you lose a little money - that's all. When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing it was bought to do. The common law of business balance prohibits paying a little and getting a lot - it can't be done. If you deal with the lowest bidder, it is well to add something for the risk you run, and if you do that you will have enough to pay for something better.

- John Ruskin

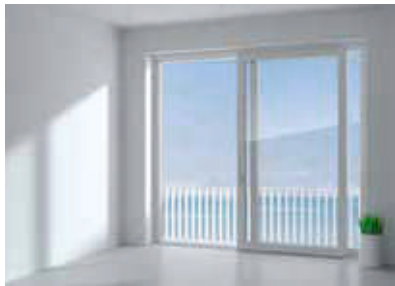

RANGE OF uPVC WINDOWS

SLIDING WINDOW SYSTEM

We offer 80mm, 92mm, and 112mm sliding systems, to cater to various client requirements. The sliding system is designed to withstand heavy winds and stormy weather conditions. Also, they are specially designed for tropical climatic conditions. Architectural elevations with a wide range of profiles and hardware are provided as per client requirements. Further, we provide Bug Screen on various window types for excellent protection against insects

SLIDING DOOR SYSTEM

Sliding Doors can be used as large balcony doors which allow proper sunlight in indoors. These doors comprise two or more panels that slide horizontally on tracks to the left or to the right. Sliding uPVC doors give aesthetic look and magnify the room space. These doors offer a variety of choices to architects by offering three-track three-shutters or three-track with multiple panels

CASEMENT WINDOW SYSTEM

These windows are attached with two or more hinges which can be opened from either side i.e., inwards or outwards. Casement windows are generally available as a single-window or in pairs, sharing one frame. They are highly energy-efficient as they create a tighter seal when closed, and are highly impenetrable for Sound. Casement windows are easier to clean and maintain as they can be opened on both sides.

TILT & TURN WINDOWS

These are European-style windows that swing like a door or tilt to the top. The usage of the big spectrum of glass options makes the window impenetrable for sound and gives a clear view. The Tilt and Turn window's unique feature is to open inside in the same configuration and allows maximum opening.

CIPET
certified

Conform to
European standards

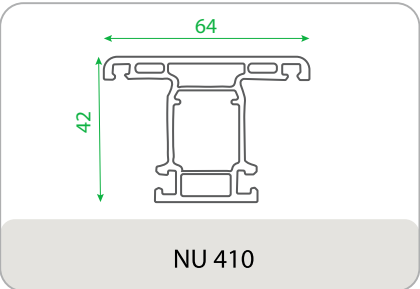

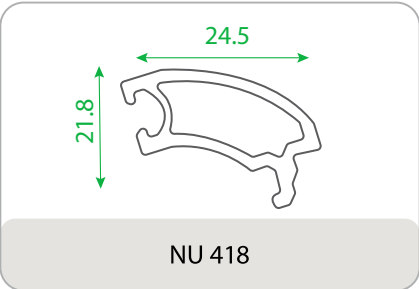

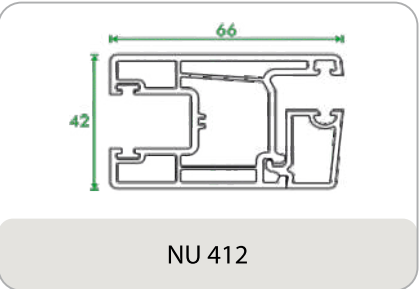

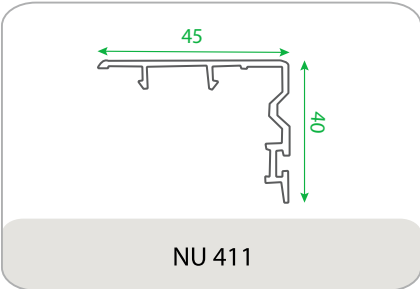

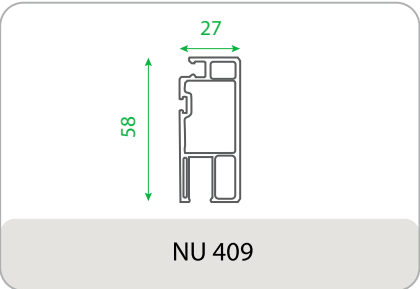

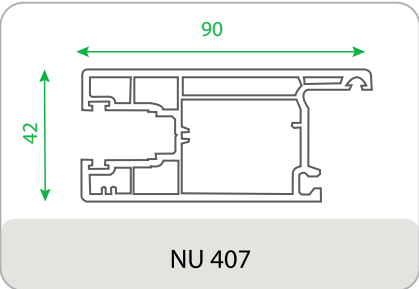

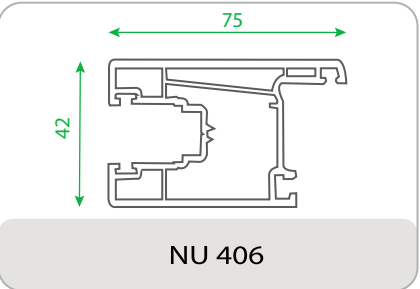

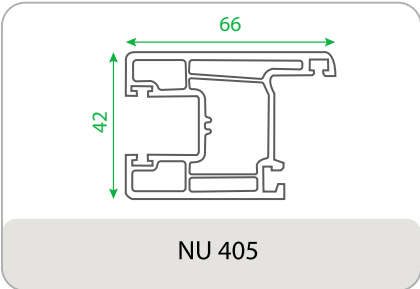

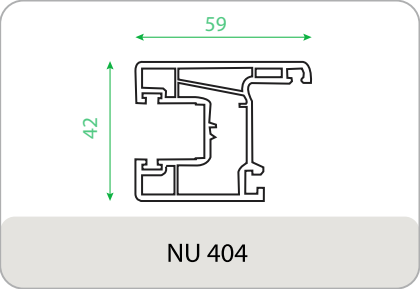

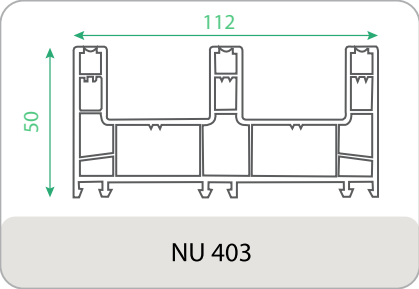

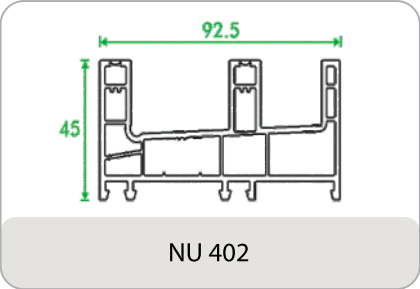

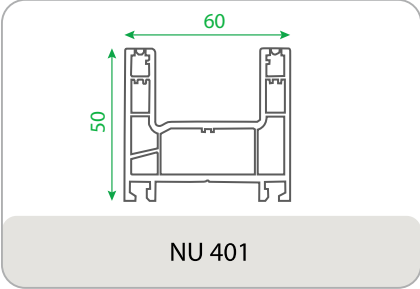

10-year
warranty

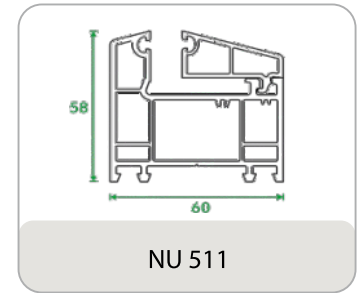

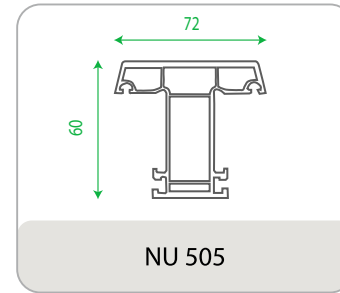

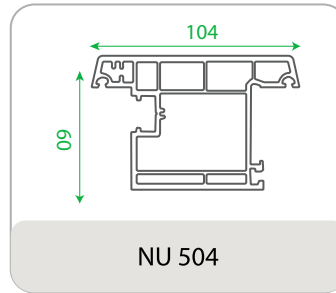

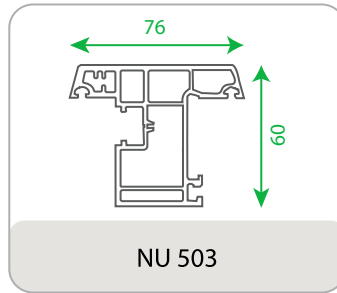

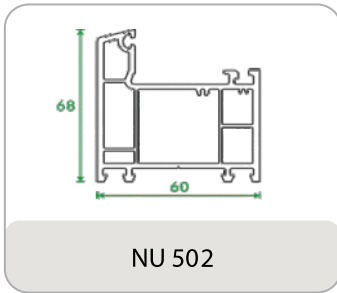

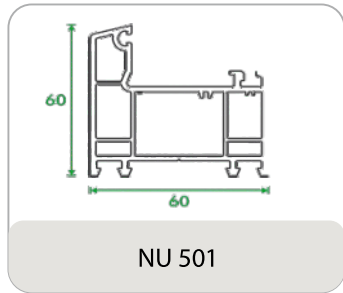

Proudly made in India, Windowtech uPVC profiles are made with the highest quality raw materials sourced from Fortune 500 companies, and engineered with cutting-edge German technology. The result is pristine white profiles which boast high wall thickness and multi - chambered designs, reinforced with galvanized steel for longevity and durability. Windowtech is also able to offer window sizes up to 20 feet in width and 10 feet in height.
